

Topic	Description
Module	Drive Technology
Module Code	ELEC
Semester	WS 2024
Lecturer	Daniel T. McGuiness, Ph.D
ECTS	3
SWS	3
Lecture Type	ILV
Teaching UE	45
Coursework Name	Assignment
Work	Individual
Suggested private Study	10 hours
Submission Format	Online via SAKAI
Submission Deadline	8 th 23:59
Late Submission	Not accepted
Resubmitting Opportunity	No re submission opportunity
Feedback	Via Comments on SAKAI

No lecture time is exclusively devoted to the aforementioned assignment.

A portion of the mark for every assignment will be, where applicable, based on style. Style, in this context, refers to organisation, flow, sentence and paragraph structure, typographical accuracy, grammar, spelling, clarity of expression and use of correct IEEE style for citations and references. Students will find *The Elements of Style (3rd ed.)* (1979) by Strunk & White, published by Macmillan, useful with an alternative recommendation being *Economist Style Guide (12th ed.)* by Ann Wroe.

Assignment Question	Maximum Point	Result
Sum	0	

Style Guidelines

Formatting

1. Code should be single spaced and use readable font sizes.
2. Add spacing around operators if it improves clarity.

To have a good overview of industrial standards of python programming, please have a look at [PEP 8 - Style Guide for Python Code](#).

Commenting

1. The goal of commenting is to make your code easily understandable by someone else.
2. There should be a block comment at the start of your program explaining what it does and including: your name, the assignment and the date.
3. Every method should have a block comment explaining what it does. I suggest that you write the block comment before you write the method.
4. Add inline comments where needed to explain subtle or tricky code.
5. Add blank lines and comments to separate sections of large methods that perform several different tasks.

Naming Variables, Methods, and Classes

1. Take the time to choose meaningful names.
2. Follow naming conventions (i.e., PEP).
3. You can use abbreviations, but add comments explaining them.

Many people comment out old code that wasn't working correctly. Clean up and remove any old code before turning it in.
